Software Requirement Specification

1 Purpose and General Goals

This section covers the purpose of this project, and the general goals.

1.1 Purpose

The purpose of this system is to create a general wrapper for multiple different websites containing anime lists. As a first step, the system shall be able to gather data, enabling it to be used for analysis. For further development, the system can be expanded to allow more operations for multiple anime list websites.

1.2 General Goals

- A system that gathers data about anime.
- A system that can handle data from multiple sources.
- A system that interfaces multiple APIs to gather user data.
- The system shall be able to be used as a library for further development needs.
- The system has defined functions that can be used by external programs to get data in the format specified by this system.
- *The system shall be able to handle a predefined set of operations (add, update, delete, etc) for all sources this system interfaces.*
